

NATURELLA

SANTORI PELLAMI SPA 

MC 8969-01

NATURALS

High quality leather hides that have been tanned using biodegradable, organic ingredients and without heavy metals. The skins are tanned and then 're-tanned' before being pressed, split, and drum dyed, followed by open air, vacuum, or machine drying. They pass requirements for abrasion resistance, color fastness, grab strength, and dry and wet crocking for footwear and fashion needs. 15-20 colors are offered and in various finishes, with optional plant and flower extract dyeing. The hides have been certified compostable in controlled composting conditions according to ISO 14855. Applications are for fashion, accessories, and footwear.

When contacting the manufacturer, please be sure to reference the material's name, and not the MC Number.
